

Pure Average

PUCIT NTS Test Preparation

1. A group of 20 girls has average age of 12 years. Average age of first 12 from the same group is 13 years. What is the average age of other 8 girls in the group?
a) 10 b) 11 c) 11.5 **d) 10.5**
2. A group of 30 girls has average age of 13 years. Average age of first 18 from the same group is 15 years. What is the average age of other 12 girls in the group?
a) 12 years **b) 10 years** c) 16 years d) 10.5 years
3. The average age of 30 students in a class is 12 years. The average age of a group of 5 of the students is 10 years and that of another group of 5 students is 14 years. Find the average age of the remaining students.
a) 14 years b) 10 years **c) 12 years** d) Data inadequate
4. 30 horses are bought for Rs 150000. The average cost of 18 of them is Rs 4500. What is the average cost of others?
a) Rs5750 b) Rs7550 c) Rs5760 d) Rs4750
5. The average of 12 results is 15, and the average of the first two is 14. What is the average of the rest?
a) 15.2 b) 13.2 c) 15 d) 16
6. The average of 3 numbers is 7, that of the first two is 4, find the third number.
a) 13 b) 10 c) 12 d) 11
7. The average score of a cricketer for 10 matches is 38.9 runs. If the average for the first 6 matches is 42, find the average for the last four matches.
a) 34.52 b) 43.25 **c) 34.25** d) 35
8. The average weight of a group of 20 boys was calculated to be 89.4 kg and it was later discovered that one weight was misread as 78 kg instead of the correct one of 87 kg. The correct average weight is
a) 88.95 kg b) 89.25 kg c) 89.55 kg **d) 89.85 kg**
9. The average weight of a group of 15 boys was calculated to be 60 kg and it was later discovered that one weight was misread as 24 kg instead of the correct one of 42 kg. The correct average weight is
a) 60.2 kg **b) 61.2 kg** c) 62kg d) 61kg
10. In a calculation Ram found that the average of 10 numbers is 45 and on rechecking Shyam noticed that the some numbers 18,34,63 is wrongly taken as 81,43 and 36. Find the correct average.
a) 39.5 **b)40.5** c)45.5 d) 50.50
11. The average weight of a group of 9 boys was calculated to be 74.5 kg and it was later discovered that one weight was misread as 56 kg instead of the correct one of 65 kg. The correct average weight is
75 kg b) 73.5 kg **c) 75.5 kg** d)76kg
12. The average weight of 15 students was calculated to be 52 kg and it was later discovered that one weight was misread as 21 kg instead of the correct one of 12 kg. The correct average weight is
a) 51.4 kg b) 50.6 kg c) 52.4 kg d) 51.6 kg
13. The average of marks obtained by 90 candidates in a certain examination is 38. If the average marks of passed candidates is 40 and that of the failed candidates is 30, what is the number of candidates who passed the examination?
a) 72 b) 70 c) 75 d) 80
14. The average of marks obtained by 80 candidates in a certain examination is 32. If the average marks of passed candidates is 34 and that of the failed candidates is 18, what is the number of candidates who passed the examination?
a) 170 **b) 70** c) 80 d) 75
15. The average of marks obtained by 65 candidates in a certain examination is 25. If the average marks of passed candidates is 27 and that of the failed candidates is 14, what is the number of candidates who passed the examination?
a) 55 b) 65 c) 60 d) 75

16. The average of marks obtained by 75 candidates in a certain examination is 31. If the average marks of passed candidates is 35 and that of the failed candidates is 25, what is the number of candidates who passed the examination?
a) 40 b) 46 **c) 45** d) 54
17. The average of marks obtained by 77 candidates in a certain examination is 17. If the average marks of passed candidates is 19 and that of the failed candidates is 8, what is the number of candidates who passed the examination?
a) 36 **b) 63** c) 40 d) 70
18. The average of marks obtained by 108 candidates in a certain examination is 20. If the average marks of passed candidates is 28 and that of the failed candidates is 16, what is the number of candidates who failed the examination?
a) 70 b) 78 c) 81 **d) 72**
19. The average of marks obtained by 110 candidates in a certain examination is 15. If the average marks of passed candidates is 25 and that of the failed candidates is 14, what is the number of candidates who failed the examination?
a) 100 b) 90 c) 105 d) 95
20. The average of marks obtained by 102 candidates in a certain examination is 18. If the average marks of passed candidates is 21 and that of the failed candidates is 15, what is the number of candidates who failed the examination?
a) 51 b) 52 c) 61 d) 50
21. The average of marks obtained by 115 candidates in a certain examination is 36. If the average marks of passed candidates is 40 and that of the failed candidates is 17, what is the number of candidates who failed the examination?
a) 30 b) 25 **c) 20** d) 34
22. The average of marks obtained by 125 candidates in a certain examination is 29. If the average marks of passed candidates is 36 and that of the failed candidates is 11, what is the number of candidates who failed the examination?
a) 32 **b) 35** c) 30 d) 40
