

Time And Work

PUCIT NTS Test Preparation

1. A can do a piece of work in 5 days, and B can do it in 6 days. How long will they take if both work together?
($2\frac{8}{11}$ days)
2. A can do a piece of work in 20 days and B can do it in 30 days. How long would they take to do it working together?
a) 12 days b) 10 days c) 15 days d) 16 days
3. A can do a piece of work in 6 days. B takes 8 days. C takes as long as A and B would take working together. How long will it take B and C to complete the work together?
a) $2\frac{1}{5}$ days b) $2\frac{2}{5}$ days c) 6 days d) $4\frac{2}{5}$ days
4. A does $\frac{7}{10}$ of a piece of work in 15 days. He does the remainder with the assistance of B in 4 days. In what time could A and B together do it?
a) $13\frac{1}{3}$ days b) 12 days c) $12\frac{2}{3}$ days d) None of these
5. A can do a piece of work in 16 days, B in 10 days. A and B work at it together for 6 days and then C finishes it in 3 days, in how many days could C have done it alone?
a) 40 days b) 80 days c) 90 days d) 120 days
6. A can do a piece of work in 4 hours, B and C can do it in 3 hours, A and C can do it in 2 hours. How long would B alone take to do it?
a) 14 hours b) 12 hours c) 10 hours d) 16 hours
7. A can do a piece of work in 30 days while B can do it in 40 days. A and B working together can do it in
a) 70 days b) $42\frac{3}{4}$ days c) $27\frac{1}{7}$ days d) $17\frac{1}{7}$ days
8. A can do $(\frac{1}{3})$ of a work in 5 days and B can do $(\frac{2}{5})$ of the work in 10 days. In how many days both A and B together can do the work?
a) $7\frac{3}{4}$ days b) $9\frac{3}{8}$ days c) $8\frac{4}{5}$ days d) 10 days
9. A can do a piece of work in 5 days, B in 4 days and A, B and C together in 2 days. In what time would C do it alone?
a) 25 days b) 12 days c) 15 days d) 20 days
10. A takes half as long to do a piece of work as B takes, and if C does it in the same time as A and B together, and if all three working together would take 7 days, how long would each take separately?
a) 21 days, 42 days, 14 days b) 20 days, 40 days, $13\frac{1}{3}$ days c) 15 days, 45 days, $11\frac{1}{4}$ days d) None
11. A takes twice as much time as B and thrice as much time as C to finish a piece of work, working together they can finish the work in 2 days, find the time each will take to finish the work.
a) 12,6,4 b) 18,9,6 c) 24,12,8 d) None of these
12. If A does a piece of work in 4 days, which B can do in 5 and C can do in 6, in what time will they do it, all working together?
a) 2 days b) $\frac{50}{27}$ days c) $\frac{60}{37}$ days d) None of these
13. A, B and C can do a piece of work in 6, 12 and 24 days respectively. They altogether will complete the work in
a) $3\frac{3}{7}$ days b) $\frac{7}{24}$ days c) $4\frac{4}{5}$ days d) $\frac{5}{24}$ days
14. A, B and C can do a piece of work in 6, 12 and 24 days respectively. In what time will they altogether do it?
a) $3\frac{4}{7}$ days b) $3\frac{2}{7}$ days c) $3\frac{3}{7}$ days d) $2\frac{3}{7}$ days
15. A and B working together could mow a field in 28 days and with the help of C they could have mowed it in 21 days. How long would C take by himself?
a) 86 days b) 48 days c) 84 days d) None of these
16. B can do a piece of work in 6 hours, B and C can do it in 4 hours and A, B and C in 2 — hours. In how many hours can A and B do it?
a) $3\frac{3}{7}$ hours b) $3\frac{5}{7}$ hours c) $3\frac{2}{7}$ hours d) None of these
17. A and B together can do a piece of work in $4\frac{4}{5}$ days, B and C together can do it in 8 days, and A, B and C together in 4 days. How long would A and C together take to do it? In what time would B do it alone?
a) 8 days, 12 days b) 4 days, 8 days c) 6 days, 12 days d) 8 days, 16 days

Time And Work

PUCIT NTS Test Preparation

18. A does $\frac{2}{5}$ of a piece of work in 9 days, he then calls in B and they finish the work in 6 days. How long would B take to do the whole work by himself?
a) 18 days b) 16 days c) 12 days d) 21 days
19. A and B together can do a piece of work in 6 days and B alone could do it in 16 days. If B stops after 3 days, how long afterwards will A have finished the work?
a) $7\frac{4}{5}$ days b) $5\frac{4}{5}$ days c) $4\frac{4}{5}$ days d) $4\frac{1}{5}$ days
20. A and B can reap a field in 30 days, working together. After 11 days, however, B is called off and A finishes it by himself in 38 days more. In what time could each alone do the whole?
a) 60 days each b) 15 days, 30 days c) 20 days, 60 days d) None of these
21. A, B and C together can do a piece of work in 6 days, which B alone can do in 16 days and B and C together can do in 10 days, in how many days can A and B together do it?
a) 240/31 b) 242/31 c) 241/31 d) None of these
22. A and B together can do. A piece of work in 8 days, B alone can do it in 12 days, supposing B alone works at it for 4 days, in how many more days could A alone finish it?
a) 18 days b) 24 days c) 16 days d) 20 days
23. A and B can together do a piece of work in 15 days. B alone can do it in 20 days. A alone can do it in:
a) 30 days b) 40 days c) 45 days d) 60 days
24. A and B finish a job in 12 days while A, B and C can finish it in 8 days. C alone will finish the job in:
a) 20 days b) 14 days c) 24 days d) 16 days
25. A can complete a work in 20 days and B can do the same work in 25 days. If A after doing 5 days, leaves the work, find in how many days B will do the remaining work?
a) $18\frac{3}{4}$ days b) $8\frac{3}{4}$ days c) $17\frac{3}{4}$ days d) None of these
26. A can complete a work in 35 days and B can do the same work in 28 days. If A after doing 10 days, leaves the work, find in how many days B will do the remaining work?
a) 25 days **b) 20 days** c) 27 days d) 24 days
27. A can complete a work in 24 days and B can do the same work in 18 days. If A after doing 4 days, leaves the work, find in how many days B will do the remaining work?
a) 10 days b) 12 days **c) 15 days** d) 16 days
28. A and B can do a work in 40 and 35 days respectively. They began the work together, but A left after some time and B finished the remaining work in 10 days. After how many days did A leave?
a) $13\frac{2}{3}$ days b) 13 days **c) $13\frac{1}{3}$ days** d) 14 days
29. A and B can do a work in 35 and 25 days respectively. They began the work together, but A left after some time and B finished the remaining work in 15 days. After how many days did A leave?
a) 6 days b) 5 days **c) $5\frac{5}{6}$ days** d) 7 days
30. A and B can do a work in 20 and 15 days respectively. They began the work together, but A left after some time and B finished the remaining work in 8 days. After how many days did A leave?
a) 4 days b) 5 days c) 3 days d) 6 days
31. A and B can together finish a work in 30 days. They worked for it for 20 days and then B left. The remaining work was done by A alone in 20 more days. A alone can finish the work in:
a) 54 days **b) 60 days** c) 48 days d) 50 days
32. A and B working together can do a piece of work in 6 days, B alone could do it in 8 days. Supposing B works at it for 5 days, in how many days A alone could finish the remaining work?
a) 9 days b) 8 days c) 6 days d) 12 days
33. A and B working together can do a piece of work in 10 days, B alone could do it in 20 days. Supposing B works at it for 4 days, in how many days A alone could finish the remaining work?
a) 9 days b) 12 days **c) 16 days** d) 10 days
34. A and B working together can do a piece of work in 30 days, B alone could do it in 50 days. Supposing B works at it for 10 days, in how many days A alone could finish the remaining work?
a) 12 days **b) 60 days** c) 16 days d) 18 days
35. A and B working together can do a piece of work in $7\frac{1}{2}$ days, B alone could do it in $12\frac{1}{2}$ days. Supposing B works at it for $2\frac{1}{2}$ days, in how many days A alone could finish the remaining work?
a) 5 days b) 8 days c) 7 days **d) 15 days**
36. A can complete a job in 9 days. B in 10 days and C in 15 days. B and C start the work and are forced to leave after 2 days. The time taken to complete the remaining work
a) 13 days b) 10 days c) 9 days **d) 6 days**

Time And Work

PUCIT NTS Test Preparation

37. A can do a piece of work in $6\frac{2}{3}$ days and B in 5 days. They work together for 2 days and then A leaves B to finish the work alone. How long will B take to finish it?
a) $1\frac{1}{2}$ b) 3 days c) 2 days d) 1 day
38. A can do a piece of work in 50 days and B in 40 days. They work together for 10 days and then A leaves B to finish the work alone. How long will B take to finish it?
a) 11 days b) 18 days **c) 22 days** d) 26 days
39. A can do a piece of work in 20 days and B in 15 days. They work together for 6 days and then A leaves B to finish the work alone. How long will B take to finish it?
a) 3 days b) 4 days c) $3\frac{1}{2}$ days **d) $4\frac{1}{2}$ days**
40. A can do a piece of work in $\frac{1}{2}$ days and B in 10 days. They work together for $2\frac{1}{2}$ days and then A leaves B to finish the work alone. How long will B take to finish it?
a) $11\frac{1}{3}$ days b) $11\frac{1}{5}$ days c) 6 days **d) $11\frac{1}{2}$ days**
41. A can do $\frac{2}{3}$ of a work in 16 days. In how many days can he finish $\frac{1}{12}$ of the work?
a) 1 day b) 3 days **c) 2 days** d) $2\frac{1}{2}$ days
42. Vinay can do $\frac{1}{4}$ of a work in 5 days. In how many days can he finish $\frac{1}{5}$ of the work?
a) 20 days b) 5 days **c) 4 days** d) Data inadequate
43. A can do $\frac{4}{5}$ of a work in 8 days. In how many days can he finish $\frac{1}{10}$ of the work?
a) 1 day b) 2 days c) 3 days d) None of these
44. A, B and C can do a piece of work in 12, 18 and 24 days respectively, they work at it together, A stops the work after 4 days and B is called off 2 days before the work is done. In what time was the work finished?
a) 12 days b) 14 days c) 16 days **d) 8 days**
45. A, B and C can do a piece of work in 6, 9 and 12 days respectively, they work at it together, A stops the work after 2 days and B is called off 1 day before the work is done. In what time was the work finished?
a) 4 days b) 6 days c) 7 days d) 3 days
46. A, B and C can do a piece of work in 18, 27 and 12 days respectively, they work at it together, A stops the work after 6 days and B is called off 3 days before the work is done. In what time was the work finished?
a) 6 days b) 8 days c) 10 days **d) $6\frac{6}{13}$ days**
47. A, B and C can do a piece of work in 24, 36 and 48 days respectively, they work at it together, A stops the work after 8 days and B is called off 4 days before the work is done. In what time was the work finished?
a) 10 days b) 8 days **c) 16 days** d) 14 days
48. A and B can do a piece of work in 20 days and 30 days. Both start the work together for some time, but B leaves the job 5 days before the work is completed. Find the time in which work is finished.
a) 7 days b) 12 days **c) 14 days** d) 16 days
49. A and B can do a piece of work in 25 days and 35 days. Both start the work together for some time, but B leaves the job 7 days before the work is completed. Find the time in which work is finished.
a) 17 days **b) $17\frac{1}{2}$ days** c) 18 days d) 20 days
50. A and B can do a piece of work in 30 days and 45 days. Both start the work together for some time, but B leaves the job 15 days before the work is completed. Find the time in which work is finished.
a) 24 days **b) 28 days** c) 20 days d) 16 days
51. A and B can do a piece of work in 16 days and 24 days. Both start the work together for some time, but B leaves the job 6 days before the work is completed. Find the time in which work is finished.
a) 18 days b) 14 days **c) 12 days** d) 8 days
52. A and B can do a piece of work in 17 days and 33 days. Both start the work together for some time, but B leaves the job 7 days before the work is completed. Find the time in which work is finished.
a) $3\frac{5}{13}$ days b) $5\frac{3}{13}$ days **c) $13\frac{3}{5}$ days** d) None of these
53. A can do a work in 10 days. B takes 15 days to complete it. C takes as long as A and B would take working together. How long will it take A, B and C to complete the work together?
a) 6 days **b) 3 days** c) 4 days d) 8 days
54. A can do a work in 20 days. B takes 5 days to complete it. C takes as long as A and B would take working together. How long will it take A, B and C to complete the work together?

Time And Work

PUCIT NTS Test Preparation

- a) 2 days b) 4 days c) 3 days d) 6 days
55. A and B together can do a piece of work in 7 days. If A does twice as much work as B in a given time, find how long A alone would take to do the work?
- a) 21 days b) 20 days c) 10 days d) $10\frac{1}{2}$ days
56. A and B together can do a piece of work in 8 days. If A does twice as much work as B in a given time, find how long A alone would take to do the work?
- a) 10 days b) 12 days c) 14 days d) 16 days
57. A and B together can do a piece of work in 9 days. If A does thrice as much work as B in a given time, find how long A alone would take to do the work?
- a) 12 days b) 14 days c) 16 days d) 18 days
58. A and B together can do a piece of work in 6 days. If A does twice as much work as B in a given time, find how long A alone would take to do the work?
- a) 16 days b) 9 days c) 18 days d) 21 days
59. A and B together can do a piece of work in 3 days. If A does thrice as much work as B in a given time, find how long A alone would take to do the work?
- a) 4 days b) 10 days c) 14 days d) 12 days
60. A, B and C together can finish a piece of work in 12 days, A and C together work twice as much as B, A and B together work thrice as much as C. In what time could each do it separately?
- a) $28\frac{4}{5}$, 42, 48 b) $28\frac{4}{5}$, 36, 48 c) 28, $36\frac{4}{5}$, 48 d) None of these
61. To do a certain work B would take 4 times as long as A and C together and C 3 times as long as A and B together. The three men together complete the work in 5 days. How long would take B and C to complete the work?
- a) $9\frac{1}{11}$ days b) $11\frac{1}{9}$ days c) $26\frac{2}{3}$ days d) $28\frac{3}{5}$ days
62. To do a certain work B would take 2 times as long as A and C together and C 3 times as long as A and B together. The three men together complete the work in 16 days. How long would take B and C to complete the work?
- a) $27\frac{2}{7}$ days b) 27 days c) $27\frac{3}{7}$ days d) $27\frac{4}{7}$ days
63. A is twice as fast as B, and is therefore able to finish a work in 30 days less than B. Find the time in which they can do it working together.
- a) 18 days b) 20 days c) 24 days d) 22 days
64. A is 4 times as fast as B, and is therefore able to finish a work in 45 days less than B. Find the time in which they can do it working together.
- a) 12 days b) 16 days c) 8 days d) 20 days
65. A is thrice as fast as B, and is therefore able to finish a work in 40 days less than B. Find the time in which they can do it working together.
- a) 16 days b) 10 days c) 15 days d) None of these
66. A is thrice as good a workman as B and is therefore able to finish a work in 80 days less than B. Find the time in which they can do it work together,
- a) 30 days b) 20 days c) 24 days d) 25 days
67. If 3 men or 5 women can reap a field in 43 days, how long will 5 men and 6 women take to reap it?
- a) 15 days b) 25 days c) 18 days d) 12 days
68. If 2 men or 4 women can reap a field in 44 days, how long will 3 men and 5 women take to reap $\frac{3}{4}$ th of the field?
- a) 10 days b) 8 days c) 12 days d) None of these
69. If 6 men or 10 women can reap a field in 86 days, how long will 10 men and 12 women take to reap it?
- a) 30 days b) 35 days c) 25 days d) 40 days
70. If 4 men or 6 boys can finish a piece of work in 20 days, in how many days can 6 men and 11 boys finish it?
- a) 8 days b) 6 days c) 7 days d) 9 days
71. 10 men can finish a piece of work in 10 days whereas it takes 12 women to finish it in 10 days. If 15 men and 6
72. women undertake to complete the work how many days will they take to complete it?
- a) 11 b) 5 c) 4 d) 2
73. If 12 men and 16 days can do a piece of work in 5 days and 13 men and 24 boys can do it in 4 days, compare the daily work done by a man with that done by a boy.
- a) 1:2 b) 2:1 c) 1:3 d) 3 : 1

Time And Work

PUCIT NTS Test Preparation

74. If 30 men and 14 boys can reap a field in 21 days, in how many days will 20 men and 4 boys reap it, supposing that 3 men can do as much as 5 boys?
a) **36 days** b) 30 days c) 42 days d) 45 days
75. If 5 men and 2 boys working together can do 4 times as much work per hour as a man and a boy together, compare the work of a man with that of a boy.
a) **2:1** b) 3:1 c) 4:1 d) Data inadequate
76. If 1 must hire 2 men and 3 boys for 6 days to do the same piece of work as 11 men and 5 boys could do in $1\frac{1}{2}$ days, compare the work of a boy with that of a man.
a) 7:3 b) **3:7** c) 2:5 d) 5:2
77. 8 children and 12 men complete a certain piece of work in 9 days. Each child takes twice the time by a man to finish the work. In how many days will 12 men finish the same work?
a) 8 b) 9 c) **12** d) 15
78. A and B working alone can finish a job in 5 days and 7 days respectively. They work at it alternately for a day. If B starts the work, find in how many days the job will be finished? (**$5\frac{6}{7}$**)
79. A and B working separately can do a work in 9 and 12 days respectively. A starts the work and they work on alternate days. In how many days will the work be completed? (**$10\frac{1}{4}$**)
80. A and B working alone can finish a job in 5 days and 7 days respectively. They work at it alternately for a day. If A starts the work, find in how many days the job will be finished? (**$5\frac{4}{5}$**)
81. A and B working separately can do a work in 9 and 12 days respectively. B starts the work and they work on alternate days. In how many days will the work completed? (**$10\frac{1}{3}$**)
82. Two women, Ganga and Jamuna, working separately can mow a field in 8 and 12 hours respectively. If they work for an hour alternately, Ganga beginning at 9 am. When will the mowing be finished? (**$6\frac{1}{2}$ pm**)
83. Ram and Mohan can do a job alone in 10 and 8 days respectively. On 1st January Ram starts the job and then
84. they work on alternate days. When will the work be finished?
a) 8th January b) 10th January c) **9th January** d) None of these
85. A and B working, separately can plough a field in 6 and 10 hours respectively. At 8 AM A starts the work
86. they work in stretches of one hour alternately. When the ploughing be completed?
a) **3:20 PM** b) 2.20 PM c) 12.30 PM d) None of these
